

Four Sums in a Row

2 players, grades 2 and up

Materials: 13 counters for each player (each player should have one color or type; i.e. kidney beans and lima beans)
Game board

Each player places a counter on one of the numbers on the bottom of the game board. Player #1 adds the 2 numbers and places a counter on the sum. Player #2 can move either one of the bottom markers to any number, add the numbers and place a counter on the new sum. Play continues until one player gets 4 counters in a row (horizontal, vertical or diagonal).

FOUR SUMS IN A ROW

10	14	8	17	13
5	12	16	15	9
18	17	11	6	12
7	4	13	9	16
11	15	18	14	10

1 2 3 4 5 6 7 8 9
