

Parent Instructions – Word Problems

To carry on the learning from the classroom, please have your child review our “Problem Solving Poster” and “Questioner Sheet.”

The goal is for your child to make sense of the problem by using about two efficient strategies and an equation that shows their thinking. Please try not to correct their work. Let them solve the problem independently and then you can ask them some questions:

“What did you do first to get your answer?”

“How do you know that your answer makes sense?”

“What made you choose your strategies?”
