

1. How did we show what we know? (What math pictures did we draw? Did we write any labels?)
2. What are we trying to figure out?

3. Can we try any strategies from another math problem or activity?
4. Does what we've done so far match the problem? How?
If not, what should we change?
5. Did we prove our solution in a couple of ways? Can we do more to prove our solution?

6. How do we know we are right?
7. What strategy should we present to the class? Why did we choose it?
